Professional Summary

Passionate about driving product growth that users genuinely love, Directing cutting-edge engineering with strategic business alignment and compliance-driven execution.

Senior technology and product leader with 15+ years of experience delivering scalable digital solutions across software engineering, cloud infrastructure, cybersecurity, DevOps, data engineering, and AI-driven systems.

Combining deep technical expertise with executive leadership and entrepreneurial experience, I specialize in building high-performing teams and user-centric products through Design Thinking, UX excellence, and strong business alignment.

Throughout my career, I have worked with clients across Europe, the Levant, and the GCC region, gaining broad exposure to diverse business environments, regulatory landscapes, and digital transformation challenges. Most recently, my leadership role within an AI startup provided deep hands-on experience in managing AI-driven products, leading multidisciplinary teams, and aligning AI innovation with real business and operational needs.

Founder and multi-disciplinary technology executive, my approach blends technology, business strategy, UX thinking, and growth-focused innovation to create scalable solutions that deliver measurable business impact and exceptional customer experiences.

Skills

Operating within AI-based environments, the following managerial, product, and engineering capabilities are empowered by the strategic and operational use of modern AI technologies.

Management & Leadership

Organisational Design & Business Strategy

Covering organisational structure, culture, operating systems, value chain development, reporting governance, and strategic alignment toward business objectives and long-term vision.

Project Management

Certified in Project Management with hands-on experience managing projects from initiation to closing, including planning, budgeting, execution, governance, stakeholder coordination, and delivery management.

Agile Methodologies & Performance Management

Applying Agile values and principles through frameworks such as Scrum, Scrumban, and Spotify models, while driving continuous improvement, operational monitoring, control Systems, and value-driven delivery over rigid plan fulfillment.

People Management & Group Dynamics

Leading people and teams by applying behavioral science to understand work attitudes, behaviors, personality, and learning styles, and optimizing group dynamics to strengthen employee engagement, attachment, and collective performance.

Career Development

Guiding career development frameworks focused on career path planning, career identity, and employee growth aligned with organizational and individual objectives.

Regulatory Compliance, Data Governance & AI Governance

Experience supporting client regulatory and compliance requirements across GCC environments, including ISO/IEC 27001, GDPR, DAMA-DMBOK data management practices, AI governance frameworks, and AI materiality compliance assessments in coordination with Governance, Risk, and Compliance (GRC) functions.

Technology & Engineering Leadership

AI Engineering & Machine Learning

Hands-on leadership in AI-driven products covering NLP, Computer Vision, OCR, LLMs, VLMs, Conversational AI, AI Agents, RAG, embeddings, chunking, and AI benchmarking frameworks.

Software, Mobile & Solution Architecture

Managing software engineering teams building scalable microservice and event-driven systems with expertise in code quality, API and integration layer design, scalability, database replication, observability, testing automation, branching strategies, AI-assisted development, data-driven dashboards and analytics layers, and native and cross-platform mobile applications.

Information Security & Cybersecurity Governance

Managing cybersecurity and information security practices covering ISO/IEC 27001 frameworks, secure-by-design approaches, OWASP standards, SIEM and log monitoring, incident reporting, infrastructure hardening, governance, and operational risk management.

Cloud Infrastructure, Platform Engineering & SRE

Foundational expertise in AWS, Azure, GCP, Kubernetes, and SRE practices including SLA, SLO, and SLI-driven reliability and operational monitoring.

DevOps & DevSecOps Engineering

Leading DevOps and DevSecOps practices through CI/CD pipeline automation, code review and quality governance, security scanning, deployment automation, rollback strategies, and zero-downtime and hot deployment approaches.

Product & Growth Strategy, Agile Delivery & Quality Engineering

Startup Operations & Growth

Experience operating early-stage startups through MVP development, product-market fit validation, Lean Startup practices, business model design, growth strategies, and value proposition optimization.

Product Management & User Experience Strategy

Driving end-to-end product strategy and execution using Agile and data-driven decision-making, grounded in Design Thinking principles of desirability, feasibility, and viability, with expertise in user-centric design, customer journey mapping, gamification, and growth and churn analytics.

Gamification & Behavioral Engagement Design

Designing engagement systems using gamification principles and behavioral drivers such as loss aversion, scarcity, ownership, epic meaning, accomplishment, and curiosity to enhance user motivation, retention, and product engagement.

Quality Assurance & Agile Testing

Driving QA and Agile testing practices through structured test planning, test control, test case management, acceptance criteria validation, Definition of Done governance, and ISTQB-aligned testing methodologies across multiple test levels and test types.

Professional Experience

Senior AI Project and Operations Manager

Jazyl LLC. — Doha, Qatar | Sep 2024 – present

Leading operations, product, and project delivery within a rapidly growing AI startup, with responsibility for aligning cross-functional Product, AI Engineering, Software Engineering, and Data Labeling toward shared business objectives.

Also leading and contributing to AI-driven projects with GCC government organizations including Qatar Development Bank, National Archives of Qatar, and the Libraries Commission.

Senior Project Manager

Vneuron Inc. — Tunis, Tunisia | Aug 2023 – Aug 2024

Led a delivery transformation program for a fintech organization, driving the automation of the end-to-end product delivery lifecycle through DevOps, and process optimization. Achieved over 80% deployment automation, reduced reported technical issues by about 30%, and launched a security compliance program to enhance operational resilience, governance, and service quality while accelerating the delivery of products and services.

Technical Consultant

[Doha, Qatar | Feb 2023 – May 2023](#)

During this consultancy mission, I had the privilege of coaching a startup in a dynamic realm. My guidance played a pivotal role in enabling the startup to strategically craft a robust business model and a growth strategy.

Chief Technology and Product Officer — CTPO

[Baaz Inc. — Amman, Jordan | Jan 2020 – Sep 2022](#)

Led product strategy and technology execution as Head of Product & Technology at Baaz Inc, the first Arabic social media platform, managing 70+ people across Product, UX, Engineering, Data Science, and Operations spanning multiple nationalities. Unified fragmented Product and Technology silos into a single operating model during the product-market fit phase, enabling faster experimentation cycles and tighter alignment between user needs, business objectives, and engineering delivery.

Over three years, growth of platform user traffic by 20x, reaching top 10 in Levant region App Store rankings. Directed end-to-end product lifecycle including roadmap definition, UX research, engagement-driven iteration, and dashboard metrics aligned to business KPIs.

Managed a broad technical ecosystem covering microservices and headless architecture, native iOS/Android, data engineering, machine learning including recommendation systems, DevOps/CI/CD, infrastructure engineering, cybersecurity and compliance, QA and automation, and augmented reality. Accountable for Agile delivery governance, performance management, hiring and onboarding, career development frameworks, and board-level strategic participation.

General Manager

[Futura Digital — Tunis, Tunisia | Aug 2017 – Sep 2020](#)

Led the establishment of a technology company from the ground up within a short timeframe, covering organizational, product, engineering, and infrastructure dimensions. This included implementing a natural management system, maintaining a low turnover rate, and creating an effective culture deck to support team alignment and sustainable growth. Product development was driven through Scrum and user-centric methodologies, including user interviews and research to guide product decisions and customer experience.

Built and managed a complete technology ecosystem including full-stack JavaScript platforms, cross-platform mobile applications, DevOps and CI/CD pipelines based on Kubernetes, data engineering and BI systems, a small high-availability datacenter environment, and both automation and manual testing practices. In parallel, worked as a professional trainer specialized in advanced web technologies.

Founder & CEO / CTO

Smart Web — Tunis, Tunisia | Sep 2009 – Jan 2018

Created in my early twenties, it was my kitchen where I was obsessed with delivering the latest web technology with the best user experience, from the information architecture to hosting and maintenance passing through wireframe, design, development, and testing.

Every new project was a unique experience, no two projects are the same, we delivered websites in several domains, including agriculture, education, environmental, security, non-profit organization, news, media, etc. And for government, public, and private sectors targeting Tunisian and European markets.

I was also a professional trainer for web technology with an advanced level in HTML, DOM, CSS, JavaScript, and Web Performance. And at the same time, I take the opportunity to give an introduction to user experience design.

Licenses & Certifications

Google Project Management: Professional Certificate

Google | [Certificate Link](#) | April 2023

Foundations of Project Management	Credential ID: YVWKPLGG575V
Project Initiation: Starting a Successful Project	Credential ID: RS6RKXY77642
Project Planning: Putting It All Together	Credential ID: DEUC4TEB2U49
Project Execution: Running the Project	Credential ID: ERVJHWF97UFP
